TEXAS COMPTROLLER *of* PUBLIC ACCOUNTS

P.O. Box 13528 • AUSTIN, TX 78711-3528

January 27, 2014

Dr. Rodney Cavness
Superintendent
Port Neches-Groves Independent School District
620 Avenue C
Port Neches, Texas 77651

Dear Superintendent Cavness:

On November 14, 2013, the Comptroller received the completed application (Application # 354) for a limitation on appraised value under the provisions of Tax Code Chapter 313¹. This application was originally submitted in November 2013 to the Port Neches-Groves Independent School District (the school district) by Air Liquide Large Industries U.S., LP (the applicant). This letter presents the results of the Comptroller's review of the application:

- 1) under Section 313.025(h) to determine if the property meets the requirements of Section 313.024 for eligibility for a limitation on appraised value under Chapter 313, Subchapter C; and
- 2) under Section 313.025(d), to make a recommendation to the governing body of the school district as to whether the application should be approved or disapproved using the criteria set out by Section 313.026.

The school district is currently classified as a rural school district in Category 2 according to the provisions of Chapter 313. Therefore, the applicant properly applied under the provisions of Subchapter C, applicable to rural school districts. The amount of proposed qualified investment (\$117 million) is consistent with the proposed appraised value limitation sought (\$30 million). The property value limitation amount noted in this recommendation is based on property values available at the time of application and may change prior to the execution of any final agreement.

The applicant is an active franchise taxpayer in good standing, as required by Section 313.024(a), and is proposing the construction of a manufacturing facility in Jefferson County, an eligible property use under Section 313.024(b). The Comptroller has determined that the property, as described in the application, meets the requirements of Section 313.024 for eligibility for a limitation on appraised value under Chapter 313, Subchapter C.

After reviewing the application using the criteria listed in Section 313.026, and the information provided by the applicant, the Comptroller's recommendation is that this application under Tax Code Chapter 313 be approved.

Our review of the application assumes the truth and accuracy of the statements in the application and that, if the application is approved, the applicant would perform according to the provisions of the agreement reached with the school district. Our recommendation does not address whether the applicant has complied with all Chapter 313 requirements; the school district is responsible for verifying that all requirements of the statute have been fulfilled. Additionally, Section 313.025 requires the school district to only approve an application if the school district finds that the information in the application is true and

¹ All statutory references are to the Texas Tax Code, unless otherwise noted.

correct, finds that the applicant is eligible for a limitation and determines that granting the application is in the best interest of the school district and this state. As stated above, the Comptroller's recommendation is prepared by generally reviewing the application and supporting documentation in light of the Section 313.026 criteria.

Note that any new building or other improvement existing as of the application review start date of November 14, 2013 or any tangible personal property placed in service prior to that date may not become "Qualified Property" as defined by 313.021(2).

The Comptroller's recommendation is based on the application submitted by the school district and reviewed by the Comptroller. The recommendation may not be used by the school district to support its approval of the property value limitation agreement if the application is modified, the information presented in the application changes, or the limitation agreement does not conform to the application. Additionally, this recommendation is contingent on future compliance with the Chapter 313 and Texas Administrative Code, with particular reference to the following requirements related to the execution of the agreement:

- 1) The applicant must provide the Comptroller a copy of the proposed limitation on appraised value agreement no later than ten (10) days prior to the meeting scheduled by the school district to consider approving the agreement, so that the Comptroller may review it for compliance with the statutes and the Comptroller's rules as well as consistency with the application;
- 2) The limitation agreement must contain provisions that require:
 - a. the applicant to provide sufficient information to the Central Appraisal District (CAD) to distinguish between and separately appraise qualified property (as defined by 313.021(2)) from any property that is not qualified;
 - b. the school district to confirm with the CAD that the applicant has provided such information; and
 - c. that the Comptroller is provided with the CAD approved information no later than the first annual reporting period following the execution of the agreement;
- 3) The Comptroller must confirm that it received and reviewed the draft agreement and affirm the recommendation made in this letter;
- 4) The school district must approve and execute a limitation agreement that has been reviewed by the Comptroller within a year from the date of this letter; and
- 5) The school district must provide a copy of the signed limitation agreement to the Comptroller within seven (7) days after execution, as required by Section 313.025.

Should you have any questions, please contact Robert Wood, director of Economic Development & Analysis Division, by email at robert.wood@cpa.state.tx.us or by phone at 1-800-531-5441, ext. 3-3973, or direct in Austin at 512-463-3973.

Sincerely,

Martin A. Hubert
Deputy Comptroller

Enclosure

Economic Impact for Chapter 313 Project

Applicant	Air Liquide Large Industries US, LP
Tax Code, 313.024 Eligibility Category	Manufacturing
School District	Port-Neches Groves ISD
2012-13 Enrollment in School District	4,850
County	Jefferson County
Total Investment in District	\$117,000,000
Qualified Investment	\$117,000,000
Limitation Amount	\$30,000,000
Number of total jobs committed to by applicant	8*
Number of qualifying jobs committed to by applicant	7
Average Weekly Wage of Qualifying Jobs committed to by applicant	\$1,442
Minimum Weekly Wage Required Tax Code, 313.051(b)	\$1,175
Minimum Annual Wage committed to by applicant for qualified jobs	\$75,000
Investment per Qualifying Job	\$16,714,286
Estimated 15 year M&O levy without any limit or credit:	\$14,366,976
Estimated gross 15 year M&O tax benefit	\$6,917,019
Estimated 15 year M&O tax benefit (after deductions for estimated school district revenue protection--but not including any deduction for supplemental payments or extraordinary educational expenses):	\$6,037,766
Tax Credits (estimated - part of total tax benefit in the two lines above - appropriated through Foundation School Program)	\$904,800
Net M&O Tax (15 years) After Limitation, Credits and Revenue Protection:	\$8,329,210
Tax benefit as a percentage of what applicant would have paid without value limitation agreement (percentage exempted)	42.0%
Percentage of tax benefit due to the limitation	86.9%
Percentage of tax benefit due to the credit	13.1%
* Applicant is requesting district to waive requirement to create minimum number of qualifying jobs pursuant to Tax Code, 313.025 (f-1).	

This presents the Comptroller's economic impact evaluation of Air Liquide Large Industries US, LP (the project) applying to Port Neches-Groves Independent School District (the district), as required by Tax Code, 313.026. This evaluation is based on information provided by the applicant and examines the following criteria:

- (1) the recommendations of the comptroller;
- (2) the name of the school district;
- (3) the name of the applicant;
- (4) the general nature of the applicant's investment;
- (5) the relationship between the applicant's industry and the types of qualifying jobs to be created by the applicant to the long-term economic growth plans of this state as described in the strategic plan for economic development submitted by the Texas Strategic Economic Development Planning Commission under Section 481.033, Government Code, as that section existed before February 1, 1999;
- (6) the relative level of the applicant's investment per qualifying job to be created by the applicant;
- (7) the number of qualifying jobs to be created by the applicant;
- (8) the wages, salaries, and benefits to be offered by the applicant to qualifying job holders;
- (9) the ability of the applicant to locate or relocate in another state or another region of this state;
- (10) the impact the project will have on this state and individual local units of government, including:
 - (A) tax and other revenue gains, direct or indirect, that would be realized during the qualifying time period, the limitation period, and a period of time after the limitation period considered appropriate by the comptroller; and
 - (B) economic effects of the project, including the impact on jobs and income, during the qualifying time period, the limitation period, and a period of time after the limitation period considered appropriate by the comptroller;
- (11) the economic condition of the region of the state at the time the person's application is being considered;
- (12) the number of new facilities built or expanded in the region during the two years preceding the date of the application that were eligible to apply for a limitation on appraised value under this subchapter;
- (13) the effect of the applicant's proposal, if approved, on the number or size of the school district's instructional facilities, as defined by Section 46.001, Education Code;
- (14) the projected market value of the qualified property of the applicant as determined by the comptroller;
- (15) the proposed limitation on appraised value for the qualified property of the applicant;
- (16) the projected dollar amount of the taxes that would be imposed on the qualified property, for each year of the agreement, if the property does not receive a limitation on appraised value with assumptions of the projected appreciation or depreciation of the investment and projected tax rates clearly stated;
- (17) the projected dollar amount of the taxes that would be imposed on the qualified property, for each tax year of the agreement, if the property receives a limitation on appraised value with assumptions of the projected appreciation or depreciation of the investment clearly stated;
- (18) the projected effect on the Foundation School Program of payments to the district for each year of the agreement;
- (19) the projected future tax credits if the applicant also applies for school tax credits under Section 313.103; and
- (20) the total amount of taxes projected to be lost or gained by the district over the life of the agreement computed by subtracting the projected taxes stated in Subdivision (17) from the projected taxes stated in Subdivision (16).

Wages, salaries and benefits [313.026(6-8)]

After construction, the project will create eight new jobs when fully operational. Seven of the jobs will meet the criteria for qualifying jobs as specified in Tax Code Section 313.021(3). According to the Texas Workforce Commission (TWC), the regional manufacturing wage for the South East Texas Council of Governments, where Jefferson County is located was \$61,118 in 2013. The annual average manufacturing wage for 2012-2013 for Jefferson County is \$91,338. That same year, the county annual average wage for all industries was \$50,505. In addition to an annual average salary of \$75,000 each qualifying position will receive benefits necessary to comply with the Affordable Care Act, a competitive 401(k) retirement savings plan, vacation, sick leave and skills training. The project's total investment is \$117 million, resulting in a relative level of investment per qualifying job of \$16.7 million.

Ability of applicant to locate to another state and [313.026(9)]

According to Air Liquide Large Industries US, LP's application, Air Liquide Large Industries World Business Line has established its presence around the world through its design and installation of more than 400 air separation units (ASUs), some 100 hydrogen production plants (of which 38 are major units) and 18 cogeneration units. This presence is strengthened by the Group's vast pipeline network, which allows Air Liquide to meet the air, gas and hydrogen requirements of major customers in some of the world's largest industrial basins, in the United States, Europe and Asia. This project can be built and installed anywhere on the pipeline that runs from Corpus Christi, TX to Lake Charles, LA.

Number of new facilities in region [313.026(12)]

During the past two years, six projects in the South East Texas Council of Governments applied for value limitation agreements under Tax Code, Chapter 313.

Relationship of applicant's industry and jobs and Texas's economic growth plans [313.026(5)]

The Texas Economic Development Plan focuses on attracting and developing industries using technology. It also identifies opportunities for existing Texas industries. The plan centers on promoting economic prosperity throughout Texas and the skilled workers that the Air Liquide Large Industries US, LP project requires appear to be in line with the focus and themes of the plan. Texas identified manufacturing as one of six target clusters in the Texas Cluster Initiative. The plan stresses the importance of technology in all sectors of the manufacturing industry.

Economic Impact [313.026(10)(A), (10)(B), (11), (13-20)]

Table 1 depicts Air Liquide Large Industries US, LP's estimated economic impact to Texas. It depicts the direct, indirect and induced effects to employment and personal income within the state. The Comptroller's office calculated the economic impact based on 16 years of annual investment and employment levels using software from Regional Economic Models, Inc. (REMI). The impact includes the construction period and the operating period of the project.

The statewide average ad valorem tax base for school districts in Texas was \$1.65 billion in 2012-2013. Port Neches-Groves ISD's ad valorem tax base in 2012-2013 was \$2.5 billion. The statewide average wealth per WADA was estimated at \$343,155 for fiscal 2012-2013. During that same year, Port Neches-Groves ISD's estimated wealth per WADA was \$442,964. The impact on the facilities and finances of the district are presented in Attachment 2.

Table 2 examines the estimated direct impact on ad valorem taxes to the school district, Jefferson County, Jefferson Co. Drainage District #7 and Jefferson Co. Navigation District with all property tax incentives sought being granted using estimated market value from Air Liquide Large Industries US, LP's application. Air Liquide Large Industries US, LP has applied for both a value limitation under Chapter 313, Tax Code and tax abatements with the county, the drainage district #7 and the navigation district. Table 3 illustrates the estimated tax impact of the Air Liquide Large Industries US, LP project on the region if all taxes are assessed.

¹Tax Rate per \$100 Valuation

Attachment 1 includes schedules A, B, C, and D provided by the applicant in the application. Schedule A shows proposed investment. Schedule B is the projected market value of the qualified property. Schedule C contains employment information, and Schedule D contains tax expenditures and other tax abatement information.

Attachment 2, provided by the district and reviewed by the Texas Education Agency, contains information relating to the financial impact of the proposed project on the finances of the district as well as the tax benefit of the value limitation. "Table 5" in this attachment shows the estimated 15 year M&O tax levy without the value limitation agreement would be \$14,366,976. The estimated gross 15 year M&O tax benefit, or levy loss, is \$6,917,019.

Attachment 3 is an economic overview of Jefferson County.

Disclaimer: This examination is based on information from the application submitted to the school district and forwarded to the comptroller. It is intended to meet the statutory requirement of Chapter 313 of the Tax Code and is not intended for any other purpose.

	Post- Settle-Up Period								
	Post- Settle-Up Period								

Qualifying Time Period usually begins with the final board approval of the application and extends generally for the following two complete tax years.

Column A: This represents the total dollar amount of planned investment in tangible personal property the applicant considers qualified investment - as defined in Tax Code §313.02(1)(A)-(D). For the purposes of investment, please list amount invested each year, not cumulative totals.

Column B: Indicate estimates of investment for "replacement" property-property that is part of original agreement but scheduled for probable replacement during limitation period.

Column C: The total dollar amount of planned investment each year in buildings or nonremovable component of buildings that the applicant considers qualified investment under Tax Code §313.02(1)(E).

Column D: For the years outside the qualifying time period, this number should simply represent the planned investment in new buildings or nonremovable components of buildings.

Column E: Dollar value of other investment that may not be qualified investment but that may affect economic impact and total value for planning, construction and operation of the facility. The most significant example for many projects would be land. Other examples may be items such as professional services, etc.

Note: Land can be listed as part of investment during the "pre-year 1" time period. It cannot be part of qualifying investment.

Notes: For advanced clean energy projects, nuclear projects, projects with deferred qualifying time periods, and projects with lengthy application review periods, insert additional rows as needed.

This schedule must be submitted with the original application and any application for tax credit. When using this schedule for any purpose other than the original application, replace original estimates with actual appraisal district data for past years and update estimates for current and future years. If original estimates have not changed, enter those amounts for future years.

Mr. Robert Wood
Director, Economic Development and Analysis
Texas Comptroller of Public Accounts
Lyndon B. Johnson State Office Building
111 East 17th Street
Austin, Texas 78774

Dear Mr. Wood:

As required by the Tax Code, §313.025 (b-1), the Texas Education Agency (TEA) has evaluated the impact of the proposed Air Liquide Large Industries U.S. LP project on the number and size of school facilities in Port Neches-Groves Independent School District (PNGISD). Based on the analysis prepared by Moak, Casey and Associates for the school district and a conversation with the PNGISD chief financial officer, Cheryl Hernandez, the TEA has found that the operations of Air Liquide Large Industries U.S. LP project would not have a significant impact on the number or size of school facilities in PNGISD.

Please feel free to contact me by phone at (512) 463-9186 or by email at al.mckenzie@tea.state.tx.us if you need further information about this issue.

Sincerely,

Al McKenzie, Manager
Foundation School Program Support

Mr. Robert Wood
Director, Economic Development and Analysis
Texas Comptroller of Public Accounts
Lyndon B. Johnson State Office Building
111 East 17th Street
Austin, Texas 78774

Dear Mr. Wood:

The Texas Education Agency (TEA) has analyzed the revenue gains that would be realized by the proposed Air Liquide Large Industries U.S. LP project for the Port Neches-Groves Independent School District (PNGISD). Projections prepared by the TEA State Funding Division confirm the analysis that was prepared by Moak, Casey and Associates and provided to us by your division. We believe their assumptions regarding the potential revenue gain are valid, and their estimates of the impact of the Air Liquide Large Industries U.S. LP project on PNGISD are correct.

Please feel free to contact me by phone at (512) 463-9186 or by email at al.mckenzie@tea.state.tx.us if you need further information about this issue.

Sincerely,

Al McKenzie, Manager
Foundation School Program Support

**SUMMARY OF FINANCIAL IMPACT OF THE PROPOSED AIR
LIQUIDE LARGE INDUSTRIES U.S. LP PROJECT ON THE
FINANCES OF THE PORT NECHES-GROVES INDEPENDENT
SCHOOL DISTRICT UNDER A REQUESTED CHAPTER 313
PROPERTY VALUE LIMITATION**

December 15, 2013

Final Report

PREPARED BY

Estimated Impact of the Proposed Air Liquide Large Industries U.S. LP Project on the Finances of the Port Neches-Groves Independent School District under a Requested Chapter 313 Property Value Limitation

Introduction

Air Liquide Large Industries U.S. LP (Air Liquide) has requested that the Port Neches-Groves Independent School District (PN-GISD) consider granting a property value limitation under Chapter 313 of the Tax Code, also known as the Texas Economic Development Act. In an application submitted to PN-GISD on November 8, 2013, Air Liquide proposes to invest \$117 million to construct a new manufacturing project in PN-GISD.

The Air Liquide project is consistent with the state's goal to "encourage large scale capital investments in this state." When enacted as House Bill 1200 in 2001, Chapter 313 of the Tax Code granted eligibility to companies engaged in manufacturing, research and development, and renewable electric energy production to apply to school districts for property value limitations. Subsequent legislative changes expanded eligibility to clean coal projects, nuclear power generation and data centers, among others.

Under the provisions of Chapter 313, PN-GISD may offer a minimum value limitation of \$30 million. The provisions of Chapter 313 call for the project to be fully taxable in the 2015-16 and 2016-17 school years, unless the District and the Company agree to an extension of the start of the two-year qualifying time period. For the purpose of this analysis, it is assumed that the qualifying time period will be the 2015-16 and 2016-17 school years. Beginning in 2017-18, the project would go on the local tax roll at \$30 million and remain at that level of taxable value for eight years for maintenance and operations (M&O) taxes.

The full taxable value of the project could be assessed for debt service taxes on voter-approved bond issues throughout the limitation period, with PN-GISD currently levying a \$0.3960 per \$100 I&S tax rate. The full value of the investment is expected to reach \$117 million in 2016-17.

In the case of the Air Liquide project, the agreement calls for a calculation of the revenue impact of the value limitation in years 3-10 of the agreement, under whatever school finance and property tax laws are in effect in each of those years. PN-GISD would experience a revenue loss as a result of the implementation of the value limitation in the 2017-18 school year (-\$879,253). No out-year revenue losses are expected under current law.

Under the assumptions outlined below, the potential tax benefits under a Chapter 313 agreement could reach an estimated \$6 million over the course of the agreement. This amount is net of any anticipated revenue losses for the District.

School Finance Mechanics

Under the current school finance system, the property values established by the Comptroller's Office that are used to calculate state aid and recapture lag by one year, a practical consequence of the fact that the Comptroller's Office needs this time to conduct its property value study and

the audits of appraisal district operations in alternating years. A taxpayer receiving a value limitation pays M&O taxes on the reduced value for the project in years 3-10 and receives a tax bill for I&S taxes based on the full project value throughout the qualifying and value limitation period (and thereafter). The school funding formulas use the Comptroller's property values that reflect a reduction due to the property value limitation in years 4-11 as a result of the one-year lag in property values.

The third year is often problematical financially for a school district that approves a Chapter 313 value limitation. The implementation of the value limitation often results in a revenue loss to the school district in the third year of the agreement that would not be reimbursed by the state, but require some type of compensation from the applicant under the revenue protection provisions of the agreement. In years 4-10, smaller revenue losses would be anticipated when the state M&O property values are aligned at the minimum value established by the Board on both the local tax roll and the corresponding state property value study.

Under the HB 1 system adopted in 2006, most school districts received Additional State Aid for Tax Reduction (ASATR) that was used to maintain their target revenue amounts established at the revenue levels under old law for the 2005-06 or 2006-07 school years, whichever was highest. In terms of new Chapter 313 property value limitation agreements, adjustments to ASATR funding often moderated the impact of the reduced M&O collections as a result of the limitation, in contrast with the earlier formula-driven finance system.

House Bill 3646 as enacted in 2009 created more "formula" school districts that were less dependent on ASATR state aid than had been the case previously. The formula reductions enacted during the First Called Session in 2011 made \$4 billion in reductions to the existing school funding formulas for the 2011-12 and 2012-13 school years. For the 2011-12 school year, across-the-board reductions were made that reduced each district's WADA count and resulted in an estimated 781 school districts still receiving ASATR to maintain their target revenue funding levels, while an estimated 243 districts operated directly on the state formulas. For the 2012-13 school year, the changes called for smaller across-the-board reductions and funding ASATR-receiving target revenue districts at 92.35 percent of the level provided for under the existing funding formula, with 689 districts operating on formula and 335 districts still receiving ASATR funding.

Senate Bill 1 and House Bill 1025 as passed by the 83rd Legislature made significant increases to the basic allotment and other formula changes by appropriation. The ASATR reduction percentage is increased slightly to 92.63 percent, while the basic allotment is increased by \$325 and \$365, respectively, for the 2013-14 and 2014-15 school years. A slight increase in the guaranteed yield for the 6 cents above compressed—known as the Austin yield—is also included. With the basic allotment increase, it is estimated that approximately 300 school districts will still receive ASATR in the 2013-14 school year and 273 districts would do so in the 2014-15 school year. Current state policy calls for ASATR funding to be eliminated by the 2017-18 school year.

PN-GISD is classified as a formula district under the estimates presented below. As a result, the District's finances are more susceptible to changes in property values and M&O tax collections like those associated with the implementation of a value limitation agreement.

One concern in projecting into the future is that the underlying state statutes in the Education Code were not changed in order to provide these funding increases. All of the major formula changes were made by appropriation, which gives them only a two-year lifespan unless renewed in the 2015 legislative session. Despite this uncertainty, it is assumed that these changes will

remain in effect for the forecast period for the purpose of these estimates, assuming a continued legislative commitment to these funding levels in future years.

A key element in any analysis of the school finance implications is the provision for revenue protection in the agreement between the school district and the applicant. In the case of the Air Liquide project, the agreement calls for a calculation of the revenue impact of the value limitation in years 3-10 of the agreement, under whatever school finance and property tax laws are in effect in each of those years. This meets the statutory requirement under Section 313.027(f)(1) of the Tax Code to provide school district revenue protection language in the agreement.

Underlying Assumptions

There are several approaches that can be used to analyze the future revenue stream of a school district under a value limitation. Whatever method is used, a reasonable analysis requires the use of a multi-year forecasting model that covers the years in which the agreement is in effect. The Chapter 313 application now requires 15 years of data and analysis on the project being considered for a property value limitation.

The general approach used here is to maintain static enrollment and property values in order to isolate the effects of the value limitation under the school finance system. The SB I basic allotment increases are reflected in the underlying models. The projected taxable values of the Air Liquide project are factored into the base model used here in order to simulate the financial impact of the construction of the project in the absence of a value limitation agreement. The impact of the limitation value for the proposed Air Liquide project is isolated separately and the focus of this analysis.

Student enrollment counts are held constant at 4,564 students in average daily attendance (ADA) in analyzing the effects of the Air Liquide project on the finances of PN-GISD. The District's local tax base reached \$2.5 billion for the 2013 tax year and is maintained at that level for the forecast period in order to isolate the effects of the property value limitation. Previously-approved Chapter 313 agreements have been incorporated into the base of both models shown here. An M&O tax rate of \$1.04 per \$100 is used throughout this analysis. PN-GISD has estimated state property wealth per weighted ADA or WADA of approximately \$452,406 for the 2013-14 school year. The enrollment and property value assumptions for the 15 years that are the subject of this analysis are summarized in Table 1.

School Finance Impact

School finance models were prepared for PN-GISD under the assumptions outlined above through the 2029-30 school year. Beyond the 2014-15 school year, no attempt was made to forecast the 88th percentile or Austin yield that influence future state funding beyond the projected level for that school year. In the analyses for other districts and applicants on earlier projects, these changes appeared to have little impact on the revenue associated with the implementation of the property value limitation, since the baseline and other models incorporate the same underlying assumptions.

Under the proposed agreement, a model is established to make a calculation of the "Baseline Revenue" by adding the value of the proposed Air Liquide facility to the model, but without assuming that a value limitation is approved. The results of the model are shown in Table 2.

A second model is developed which adds the Air Liquide value but imposes the proposed property value limitation effective in the third year, which in this case is the 2017-18 school year. The results of this model are identified as “Value Limitation Revenue Model” under the revenue protection provisions of the proposed agreement (see Table 3). A summary of the differences between these models is shown in Table 4.

Under these assumptions, PN-GISD would experience a revenue loss as a result of the implementation of the value limitation in the 2017-18 school year (-\$879,253). The revenue reduction results from the mechanics of the one-year lag associated with the state property value study.

The formula loss of \$879,253 cited above between the base and the limitation models is based on an assumption that Air Liquide would receive M&O tax savings of \$868,296 when the \$30 million limitation is implemented. As shown in Table 4, there is no state aid offset for the 2017-18 school year. In addition, PN-GISD is expected to lose \$10,976 in Tier II state aid in that year.

The Comptroller’s state property value study influences these calculations, as noted previously. At the school-district level, a taxpayer benefiting from a property value limitation has two property values assigned by the local appraisal district for their property covered by the limitation: (1) a reduced value for M&O taxes, and (2) the full taxable value for I&S taxes. This situation exists for the eight years that the value limitation is in effect. Two state property value determinations are also made for school districts granting Chapter 313 agreements, consistent with local practice. A consolidated single state property value had been provided previously.

Impact on the Taxpayer

Table 5 summarizes the impact of the proposed property value limitation in terms of the potential tax savings under the property value limitation agreement. The focus of this table is on the M&O tax rate only. As noted previously, the property is fully taxable in the first two years under the agreement. A \$1.04 per \$100 of taxable value M&O rate is assumed in 2013-14 and thereafter.

Under the assumptions used here, the potential tax savings from the value limitation total \$6 million over the life of the agreement. In addition, Air Liquide would be eligible for a tax credit for M&O taxes paid on value in excess of the value limitation in each of the first two qualifying years. The credit amount is paid out slowly through years 4-10 due to statutory limits on the scale of these payments over these seven years, with catch-up payments permitted in years 11-13. The tax credits are expected to total approximately \$0.9 million over the life of the agreement, with no unpaid tax credits anticipated. The school district is to be reimbursed by the Texas Education Agency for the cost of these credits.

The key PN-GISD revenue losses are expected to total approximately -\$879,253 in the initial limitation year of the agreement under current law. The total potential net tax benefits (inclusive of tax credits but after hold-harmless payments are made) are estimated to reach \$6.0 million over the life of the agreement. While legislative changes to ASATR funding could increase the hold-harmless amount owed in the initial year of the agreement, there would still be a substantial tax benefit to Air Liquide under the value limitation agreement for the remaining years that the limitation is in effect.

Facilities Funding Impact

The Air Liquide project remains fully taxable for debt services taxes, with PN-GISD currently levying a \$0.396per \$100 I&S rate. The value of the Air Liquide project is expected to depreciate over the life of the agreement and beyond, but full access to the additional value is expected to assist the District in meeting its future debt service needs.

The Air Liquide project is not expected to affect PN-GISD in terms of enrollment. Continued expansion of the project and related development could result in additional employment in the area and an increase in the school-age population, but this project is unlikely to have much impact on a stand-alone basis.

Conclusion

The proposed Air Liquide manufacturing project enhances the tax base of PN-GISD. It reflects continued capital investment in keeping with the goals of Chapter 313 of the Tax Code.

Under the assumptions outlined above, the potential tax savings for the applicant under a Chapter 313 agreement could reach an estimated \$6.0 million. (This amount is net of any anticipated revenue losses for the District.) The additional taxable value also enhances the tax base of PN-GISD in meeting its future debt service obligations.

								Credits Paid		\$904,800		
								Excess Credits Unpaid		\$0		

***Note:** School District Revenue-Loss estimates are subject to change based on numerous factors, including legislative and Texas Education Agency administrative changes to school finance formulas, year-to-year appraisals of project values, and changes in school district tax rates. One of the most substantial changes to the school finance formulas related to Chapter 313 revenue-loss projections could be the treatment of Additional State Aid for Tax Reduction (ASATR). Legislative intent is to end ASATR in 2017-18 school year, the same year the value limitation would take effect under the proposed application. Additional information on the assumptions used in preparing these estimates is provided in the narrative of this Report.

Attachment 3

Jefferson County

Population

- Total county population in 2010 for Jefferson County: 243,933 , up 0.2 percent from 2009. State population increased 1.8 percent in the same time period.
